

# Severn Sailing Club

## Flood Warnings (revised March 2016)

Flood warnings issued by the Environment Agency are usually too late, because they do not take account of the fact that our stretch of the Avon is backed up from the Severn at Tewkesbury.

## Flood Levels

The best means of obtaining remotely the river levels on our stretch of the Avon

is a **River Level Station at Bredon** which can be found at <https://flood-warning-information.service.gov.uk/station/2056> . You will have to copy and paste this in your browser, and bookmark it. This also shows a graph.

**You can now compare the level figure given with actual conditions at Severn Sailing Club as follows:**

**Bredon**

**Severn S.C.**

0.70m

Normal summer level

0.88m

Below jetty

1.00m

Lapping jetty

**Bredon**

**Severn S.C.**

1.02m

20mm over jetty

1.24m

1.81m

water enters dinghy park from south ditch

2.01m

water enters dinghy park from north ditch

2.06m

hedge line @rear dinghy park

2.14m

lowest caravan pitch

2.18m

highest point of slipway

2.26m

clubhouse just accessible in wellies

2.38m

cellar floor level

**Bredon**

**Severn S.C.**

2.58m

eastern caravan pitches

2.84m

3.35m

3.51m

Gate

3.67m

Top of generator plinth

4.03m

Clubhouse floor level

4.13m

OOD hut floor level

4.63m

2007 flood level
